

**SLSC High Power Vintage Military Rifle Match  
28 July 2018  
Match Report**

We had a very good day for shooting if you discount the usual muggy Southern Maryland mid-summer weather. Most of the usual suspects showed up to enjoy the festivities along with some new and returning faces. We are starting to see some Woodstock shooters show up after they see how well their old rifles can perform.

The high score went to Joe Mund who was shooting in the modified rifle category with his match .308 Garand. He shot an excellent 276-2x which placed the bar pretty high. Jake gave a good run for the money with his U.S. Rifle Model of 1917 bolt action and the centurion rifle was good for a 270-0x score leading the as issued category.

Three shooters earned the new pewter pins shaped like the appropriate vintage rifles we are now awarding. The criteria for earning the pins is detailed in our award policy, attached with this bulletin. You don't have to necessarily have the highest score to win a pin, and the pins look good on a shooting hat.

All in all, it was a very successful match and the turnout, while it could have been better was the second highest VMR match total in the 4 years we have been running the competition.

Many thanks to all the competitors for showing up and horsing the prone platforms around, to Mark for running the second relay and especially to Doc Holliday who was the second man to show up (I was first) to help set up and to act as my block officer on the first relay. Having him on the line made my job much easier.

Our next match will be the always challenging NRA Approved National Match Course on 25 August, 2018. For details on the rules and course of fire, check the Sanner's website. I'll also be sending out more information as the match date nears.

Dick Chadwick, Match Director
